## R&R ARENA SURFACE ROLLER

The all-rounder for professional surface maintenance

The rake teeth “swirl” the surface, the adjustable blade levels it and the roller wheels compacts the ground. Using a spindle the frame can be easily adjusted. The machine can be delivered with either a roller wheel or a mash pattern roller.

The wall lining scraper with the boundary wheel is standard. For transport purpose, the frame is adjusted with the jackscrew in such a manner that the device rests on the roller wheel. Alternatively with a ball hitch or three-point linkage with castor device for tractor mounting.

Of course all basic fabrication is in galvanized steel.

Article number	Width	Trailer device	Weight	Rake teeth	Net price ex VAT
RBW 17 NR	1,70 m	Castor device + tyre roller	280 kg	17	4.400,00 €
RBW 17 NG	1,70 m	Castor device + mash pattern roller	240 kg	17	3.700,00 €
RBW 22 NR	2,20 m	Castor device + tyre roller	320 kg	19	4.700,00 €
<b>For 4-wheel drive or quads from 500 ccm:</b>					
RBW 17 KR	1,70 m	Fitted ball hitch + tyre roller	270 kg	17	4.100,00 €
RBW 17 KG	1,70 m	Fitted ball-hitch + mash pattern roller	230 kg	17	3.350,00 €
<b>For 4-wheel drive or quads from 750 ccm:</b>					
RBW 22 KR	2,20 m	Fitted ball-hitch + mash pattern roller	310 kg	19	4.350,00 €

Surcharges: Hydraulic cylinder € 240,00, Additional wall lining scraper € 130,00.
