

Röwer & Rüb Solariums

Wellness for horses

De Luxe UV- and IR radiation with integrated high-power air flow

Whilst a horse is being dried, the rising warm air is sucked in a blown down under the horse's body via adjustable air vents. This permanent circulation of air offers optimum drying for your horse, even around the belly.

- + 26 IR lamps
- + 4 UV lamps
- + 18 fans
- + 18 directional air vents with 2-step switching
- + integrated air circulation system

Benefits

- + practical shape and function
- + simple operation
- + separate control panel
- + UV and IR light with individual adjustment
- + extra control of air flow
- + integrated air flow (patented)
- + selective alignment of directional warm air vents
- + individual adjustment of treatment time
- + fully variable height with integrated lifting device
- + four- or two-point suspension

Light II and III expandable modular design

Two fans are integrated into the top of each unit. They provide the system with fresh air, which gets released warmed up and released through the air.

Light IV

- + 4 Modules with 20 IR lamps
- + 8 fans
- + directional air slots
- + special futures possible

Also available as Light III (3 modules) and Light II (2 modules).
